ABSTRACT

This article deals with the principles of public order and safety. The principles of a system or domain are expressed by a set of propositions that guide to its development, in the perspective of the intentional social values. At the same time, they provide the necessary guarantees and give legitimacy to the actions and measures taken within this field, so that citizens to have the certainty that these are fair and fully within the spirit of the law.

But, in order to extract the elements of potential valorization that characteristic to the field submitted to the research and to highlight their usefulness, we submit for the consideration the principles we appreciate as defining and arguing in an exhaustive manner, the doctrine of public order and safety.
