Judiciary interpretation of genetic analysis results

Marin RUIU, PhD¹

¹lecturer, "Alexandru Ioan Cuza" Police Academy – Romania, Forensic Science Department, marin.ruiu@academiadepolitie.ro

Content description:

The article approaches the genetic identification. The genetic print is a useful evidence that we can use in fight against criminality. In the article we tackles concept such as quality of a genetic profile analysis. An analysis that now respect the principle of quality may cause a judicial error and innocent person will be incarcerated. The article also approaches the institutions and working group involved in quality control. In the last part the fingerprint are presented in special circumstances such as genetic profile. The article presents in the last part the interpretation of genetic expertise results.

Keywords:

Genetic identification, genetic expertise, genetic fingerprint, quantitative analysis of human DNA, genetic profile

Article info:
